

DIFFICULT AIRWAY CADAVER

LAB COURSE For

Paramedics (Ground & Flight)
Military / Tactical Medics
EMT-Intermediates
Critical Care Nurses
Respiratory Therapist

Morning session will include:

- ☒ Anatomy & Physiology review
- ☒ Difficult Airway Assessment & Techniques
- ☒ Trauma & Medical Airway Management
- ☒ Rapid Sequence Induction Intubation
- ☒ Case Scenarios

Afternoon session will be spent in our clean state of the art cadaver lab:

- ☒ Hands on application of all advanced airway skills.
- ☒ Video Laryngoscope Utilization
- ☒ Needle & Surgical Field Cricothyrotomy
- ☒ Needle Thoracostomy Decompression
- ☒ RSI Scenarios

Where: 7522 Connelley Drive, Suite-M
Hanover, Maryland 21076

Time: 0730 - 1630

When: February 16, 2015

Upon completion of the airway skills, participants will have the opportunity to practice non airway related skills including **pericardiocentesis** and **intraosseous needle insertion**. Participants and instructors will dissect the thoracic cavity, allowing hands on exposure with relevant discussion of anatomy and physiology of the heart, lungs, and great vessels. Class sizes are limited. Course is brought to you by the instructors at **Air Medical Experts LLC**. You will earn 7.5 CE hours for VAOEMS and CECBEMS upon completion.
