May is National Trauma Awareness Month

- Trauma is the #1 cause of death for Americans between 1 and 44 years old.
- Trauma is the #3 cause of death overall.
- Each year, more than 180,000 people lose their lives to trauma.

Target Audience

Pre-hospital providers, nurses, physicians, students, and other medical professionals involved in the care of trauma patients.

Conference Objective

Through well researched and evidence based trauma medical care, this conference is intended to heighten participants' competence by providing the most up-to-date developments in research, diagnosis, treatment and management of various aspects of trauma. The conference's overall goal is to produce positive patient outcomes, professional development opportunities and expanded clinical practice guidelines for trauma care.
