| Comments:  | The current airbags are over 25 years old and are showing signs of wear and tear. These airbags have an increased possibility of failure while performing in the harshest conditions. By increasing our quantity from 3 airbags to a 5-airbag set we are able to utilize the appropriate size air bag that the job requires instead of needing to utilize the mentality of "make it work" with the wrong equipment. |  |                         |
